Important Information

- The Class Roster page provides faculty and staff a list of students who are enrolled and waitlisted in a particular class. Instructors are given access to each class for which they are listed as an instructor, and other faculty and staff users may have access to classes depending on their role within a department or course.

- The Class Roster allows users to modify the list of students that displays. Before printing, sending emails from, or exporting the class roster, pay close attention to the selections made in the Class Roster Options box.

This document is divided into 6 sections. When working with the Class Roster, always Define Class Roster View Options first. This allows for more accurate results when performing other actions.

- Faculty Business automatically logs users off after 60 minutes of inactivity. Typing a message on the Class Roster Email page is not considered system activity. If a message takes longer than 60 minutes to compose, Faculty Business automatically logs you off and any text entered will be lost. If a message may take longer than 60 minutes to complete, consider writing it in an application like Microsoft Word, then copying and pasting the text into Faculty Business email pages.

- The email address for each student selected on the Class Roster page appears in the Bcc: (blind carbon copy) portion of the message page. This ensures that students receiving the message do not see any other recipient’s email address.

- Users can send a message to additional email addresses beyond those selected from the Class Roster page by typing them in the Bcc: field. Email addresses must be separated by semicolons.
